PROFESSIONAL SUMMARY

Data Science and AI/ML graduate with hands-on experience building machine learning, Generative AI, LLM, and Agentic AI applications using Python. Experienced with multi-agent orchestration using AutoGen, Gemini-powered applications, local LLMs, RAG pipelines, LLM guardrails, computer vision, and Flask/Streamlit deployment. Strong foundation in data preprocessing, feature engineering, model evaluation, SQL, and practical AI application development.

TECHNICAL SKILLS

Programming: Python, SQL, Java (Basics), JavaScript (Basics)

Data Science / ML: Pandas, NumPy, Matplotlib, Scikit-learn, Regression, Classification, SMOTE, Feature Engineering, Model Evaluation

Generative AI: LLMs, Google Gemini, LLaMA 3.2, Ollama, Qwen, RAG, Prompt Engineering, LLM Applications

Agentic AI: Microsoft AutoGen, LangChain, Multi-Agent Systems, Agentic Workflows, LLM Orchestration, AI Agents

GenAI / AI Engineering: FAISS, BM25, FlashRank, Groq, OpenAI-compatible APIs, Prompt Injection Detection, Jailbreak Detection, Guardrails

Web / Deployment: Flask, FastAPI, Streamlit, HTML, CSS, JavaScript, Uvicorn

Databases / BI: MySQL, SQLite, Power BI, Excel

Tools: Git, GitHub, VS Code, Jupyter, Google Colab, Spyder, Docker

PROJECTS

Multi-Agent AI Planner View Project

Built a multi-agent planning system using Microsoft AutoGen, Google Gemini and Streamlit. Implemented specialized agents communicating through a round-robin workflow for autonomous planning and task coordination, demonstrating multi-agent collaboration and LLM orchestration.

Tech: Python, AutoGen, Gemini, Streamlit, AsyncIO

RAG Code Assistant *[Generative AI | RAG | Information Retrieval]*

Developed a retrieval-augmented code assistant using code chunking, embeddings and hybrid retrieval. Combined FAISS and BM25 retrieval with FlashRank reranking and Groq-powered generation to improve context-aware responses over code content.

Tech: Python, RAG, FAISS, BM25, FlashRank, Groq, Streamlit

Mr. Dhilleswar LLaMA Chat View Project

Developed a private local AI assistant using LLaMA 3.2 1B, Docker Model Runner, OpenAI-compatible APIs and Streamlit. Implemented local inference, configurable generation settings and persistent session chat history.

Tech: LLaMA 3.2, Docker, OpenAI SDK, Streamlit, Python

LLM Guardrails View Project

Built a security-focused Generative AI application with input validation, prompt-injection and jailbreak detection, Gemini response generation, and output validation for sensitive information.

Tech: Python, Gemini, FastAPI, Pydantic, Prompt Injection, Guardrails

AI-Based Fraud Detection System View Project

Built an online transaction fraud detection system with preprocessing, feature scaling and SMOTE for class imbalance. Trained and evaluated classification models using accuracy, precision, recall, F1-score, ROC-AUC and confusion matrix, with a Flask interface for fraud-probability prediction.

Tech: Python, Scikit-learn, Pandas, NumPy, SMOTE, Flask, SQLite

AI Resume Analyzer View Project

Developed a resume analysis application that extracts skills, education, experience and projects, provides ATS-oriented feedback, compares resumes with job descriptions, and generates actionable improvement suggestions.

Tech: Python, Flask, NLP, JavaScript

YOLO Ultralytics Object Detection View Project

Built an object-detection application using Ultralytics YOLO for image-based inference, bounding-box predictions and confidence scores, demonstrating practical deep-learning and computer-vision workflows.

Tech: Python, YOLO, Ultralytics, OpenCV

JARVIS Voice Assistant View Project

Built a voice-based AI assistant combining speech recognition, an LLM-powered conversational layer and text-to-speech responses, designed for extensibility toward tool calling, memory and automation.

Tech: Python, LLM, Speech Recognition, Text-to-Speech

EXPERIENCE

Python Intern — AIM Upskill Technologies | Dec 2025 – Mar 2026

- Developed Python applications and machine-learning modules using Scikit-learn, Pandas and NumPy.
- Worked on data preprocessing, feature engineering, model evaluation and Flask-based application modules.
- Used Git/GitHub for collaborative development, debugging, testing and maintaining clean, reusable code.

EDUCATION

B. Tech – Computer Science and Engineering — Sanketika Institute of Technology and Management
|2022 – 2026 | CGPA: 7.31/10

Intermediate – MPC | 82.2%

SSC | CGPA: 10.0/10

CERTIFICATION

Full Stack Python Certification --AIM Upskill Technologies, 2026
